

**Report to Congress on
Direct Commercial Sales Authorizations to Foreign Countries and International
Organizations for Fiscal Year 2019
Sec. 655 of the Foreign Assistance Act of 1961**

Overview

This report documents defense articles and defense services licensed for permanent export under section 38 of the Arms Export Control Act (AECA), 22 U.S.C. 2778, to each foreign country and international organization during FY 2019, in response to the requirements in section 655(b)(3) of the Foreign Assistance Act (FAA) of 1961, as amended. The report specifies the aggregate dollar value and quantity of defense articles, defense services, and international military education and training activities by category, authorized to each foreign country and international organization during the fiscal year, as well as data on the actual shipments of those licensed transactions. The actual-shipment data shows the total dollar value of all shipments to each destination. Authorizations in this report are categorized based on the destination country. In accordance with subsection (c) of Section 655, this report is also being made available to the public on the internet through the Department of State, Directorate of Defense Trade Controls (DDTC), at www.pmdtcc.state.gov.

In addition to reporting information related to exports licensed under section 38 of the AECA, section 655(b)(3) of the FAA also requires the specification of semiautomatic weapons and spare parts for such weapons; such data is provided in the appendix as Category I(a) and I(h), respectively. Additionally, authorizations applicable to multiple countries in the appendix are included under the designation "Various." Since documentation for shipping purposes requires a definitive destination be declared, actual shipments for those articles approved under the designation "Various" are attributed to the country listed on the shipping documentation.

The value of authorizations for defense articles and defense services does not correlate precisely to the value of articles actually transferred during the reporting period. Most licenses issued for defense articles are valid for four years and may be used throughout the four years to execute authorized transactions. Similarly, manufacturing license and technical assistance agreements cover a wide range of programmatic activities for multi-year periods (generally exceeding the four-year validity period of defense-article export licenses). Export authorizations furnished in FY 2019 also include certain activities occurring in prior years, because the scope of the Department's regulatory authority over such agreements continues for as long as these multi-year agreements remain in effect.

The categories of the U.S. Munitions List (USML) used throughout this report are as follows; sub-category descriptions are provided for reference only. Exports by sub-category, except Categories I(a) and I(h), are not detailed in the appendices.
